Disclaimer

If you buy or use this publication you should understand clearly that it has been produced solely for learning purposes. While the author and Western Sydney University Enterprises Pty Limited have made every effort to ensure that the material in this publication is accurate and of high quality, you are expressly advised that you should not rely on the contents of this publication in order to make decisions having legal, accounting, property, financial, investment or similar consequences or for any purpose other than learning. For any purposes other than learning you should first obtain the advice of an appropriately qualified professional. The author and Western Sydney University Enterprises Pty Limited disclaim any liability to any person, whether a student or otherwise, in respect of anything, and the consequences of anything, done or omitted to be done by any such person in reliance, whether wholly or partially, on the whole, or any part of, or omission from, the contents of this publication.

Western Sydney University ABN 53 014 069 881 is a registered provider under the Commonwealth Register of Institutions and Courses for Overseas Students (CRICOS). Provider Number 00917K.

Western Sydney University Enterprises Pty Limited ABN 44 003 474 468 trading as Western Sydney University The College (CRICOS Provider Number 02851G | RTO Provider Number 90319) is a wholly owned entity of Western Sydney University. Academic Pathway Programs are delivered by Western Sydney University The College under arrangement with Western Sydney University.

Unit name	Foundation Physics 2
Unit number	900080
Coordinator	Ben Kelley
Session	2021.2
Handbook summary	This unit provides students with the background knowledge and skills in physics needed for Engineering courses. Students will cover more advanced content in mechanics, electricity, magnetism and waves.
Credit point value	10
Prerequisite/s	900079 Foundation Physics 1 (if in Extended course)
Corequisite/s	N/A
Unit incompatible with and not to be counted for credit with	700026/900068 Physics
Assumed knowledge	Year 10 Mathematics and Science or equivalent
Unit level	Level Z — Non-award preparatory unit
Attendance requirements	Students are expected to attend at least 80% of classes. Educational research consistently demonstrates that this attendance level is associated with a high likelihood of achieving a passing grade.
Enrolment restrictions	Students must be enrolled at The College
Learning outcomes	On successful completion of this unit, students should be able to: 1. use graphical and computer methods to analyse data and draw conclusions 2. identify and calculate the characteristics of uniformly accelerated motion and predict variables of motion based on past or current conditions including projectile motion 3. use Newtonian dynamics to quantitatively analyse objects in equilibrium in two dimensions 4. use the concepts of work and conservation of energy to quantitatively solve complex problems 5. use Newtonian dynamics to quantitatively analyse objects experiencing circular motion 6. demonstrate an ability to describe and apply quantitative relationship between charge, current, resistance, voltage and electrical power in the complex combined circuits 7. analyse quantitatively the properties of waves, and 8. perform experiments to demonstrate and measure physics principles and concepts.

© Western Sydney University Enterprises Pty Limited 2021

Unit content	In this unit students will learn about: • Mechanics — Dynamics and Statics — Vectors in 2D and higher, motion in 2D, projectile motion • Mechanics — Circular motion, momentum and impulse, work, energy, power and efficiency • Electricity — Ohm's Law, electric current and circuits, circuits, electrical power, advanced circuit components • Magnetism — Electric charge, Magnetic forces, electricity and magnetism, solenoids and electromagnets, the motor effect, electromagnetic induction, transformers • Waves — Properties and behaviour, the wave equation, superposition, electromagnetic spectrum, properties of light.
Mode of delivery	This unit consists of four hours of tutorials each week and five two-hour practicals in total per term alternating with seven two-hour tutorials per term, as well as online activities via vUWS.
Online learning requirements	
Essential requirements	**Essential texts** • The College, *Foundation Physics 2 practical workbook*, Western Sydney University The College, Sydney. **Further resources** • Butler, M 2003, *Preliminary physics*, Macquarie Revision Guides, Macmillan Education Australia, South Yarra. • Butler, M 2003, *HSC physics*, Macquarie Revision Guides, Macmillan Education Australia, South Yarra. • Mazur, E 2015, *Principles and practice of physics*, Pearson, Boston. **Essential equipment** • Non-programmable scientific calculator • Notebook • Protractor and ruler • Pens and pencils

ASSESSMENT ITEMS AND WEIGHTING

Assessment for this unit will be based on the following components:

Task	Weighting	Learning outcomes assessed	Mandatory task
1. Intra-session exam 1 (1 hour)	20%	1–3	Yes
2. Intra-session exam 2 (1 hour)	20%	4–6	Yes
3. Quizzes ×5 (20 mins each)	5% (1% for each quiz)	1–4, 6, 8	Yes
4. 5 practicals	15% (3% each)	1–4, 6, 8	Yes
5. End of Session exam (2 hours)	40%	1–7	Yes
Total	100%		

For details of assessment due dates, please refer to the learning guide for this unit.

All marks will be determined in accordance with The College Assessment Policy.

All assessment tasks are mandatory unless otherwise specified. Should a student fail to attempt/submit the first formal assessment task in a unit, they will be deemed to be at risk and will need to follow an intervention plan in order not to receive a Fail Non-Submission (FNS) grade. However, failure to attempt/submit all other mandatory assessment tasks will result in an immediate FNS grade for the unit.

In order to pass this unit, students must:

- attempt/submit all mandatory assessment tasks, and
- achieve an overall mark of at least 50%.

Note: *Due to the evolving COVID-19 pandemic, there may be changes to the delivery details. Students are advised to check the announcements on the unit vUWS site and communication from their teachers throughout the teaching session to ensure that they keep up to date with changing information.*
